This amendment request is NOT due to a name change only.

2. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for new personnel and any changes in the training program.

Response: There have been no changes to personnel that relate to the licensed program. There are no changes to the training program

3. Describe any changes in the location, facilities, equipment, radiation safety program, use, possession, waste management, or other procedures that relate to the licensed program.

Response: There are no changes in the location, facilities, equipment, radiation safety program, use, possession, waste management or other procedures that relate to the licensed program

4. Describe the status of the licensee's facilities, equipment, and radiation safety program, including any known contamination and whether decontamination will occur prior to transfer. Include the status of calibrations, leak tests, area surveys, wipe tests, training, quality control, and related records.

Response: The status of the licensee's facilities, equipment and radiation safety program has remained the same. There is no know contamination prior to or after the transfer, this is documented by the leak tests attached below. Training and quality control, and related records have not changed prior to or after the transfer.

5. If current decommissioning funding plans (DFP) will be changed as a result of the transfer, the revised DFP should be submitted. If other financial assurance documents will be changed as a result of the transfer, confirm that all financial assurance instruments associated with the license will be held in the transferee's name before the E-2 license is transferred, and as required by 10 CFR 30.35(f), the licensee must, within 30 days, submit financial instruments reflecting such changes.

Response: There has been no change to decommissioning funding plans or any other financial documents associated with the license.

6. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.

Response: Statement is confirmed; all records are kept digitally stored on a secondary server.

7. Confirm that both transferor and transferee agree to transferring control of the licensed material and activity, and the conditions of transfer, and that the transferee has been made aware of any open inspection items and its responsibility for possible resulting enforcement actions.

Response: Statement is confirmed and there are no open inspection items or enforcement actions pending.

8. Confirm that the transferee will abide by all constraints, conditions, requirements,

representations, and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.

Response: All constraints, conditions, requirements, representations, and commitments shall be adhered to. Statement is confirmed.

9. The transferee, in the case of fuel cycle facilities, shall provide documentation showing that it is financially qualified to conduct normal operations. The information can be in the form of income statements and balance sheet forecasts.

Response: There are no fuel cycle facilities associated with this license.
