Subject: State Consultation: Request for Comments on Amendments to Sequoyah, Watts Bar and Browns Ferry Operating Licenses (EPID L-2022-LLA-0100)

Good morning,

The U.S. Nuclear Regulatory Commission (NRC) is finalizing license amendments for Sequoyah Nuclear Plant, Units 1 & 2, Watts Bar Nuclear Plant, Units 1 and 2 and Browns Ferry Nuclear Plant, Units 1, 2, and 3. In accordance with Title 10 of the Code of Federal Regulations, Section 50.91(b), I am notifying you of the proposed issuance of these amendments.

Please reply within 1 week if the State of Tennessee has comments on the following licensing action submitted to the NRC by Tennessee Valley Authority (the licensee): "Application to Revise Technical Specifications to Adopt TSTF-554-A, Revision 1, "Revise Reactor Coolant Leakage Requirements"" dated July 13, 2022 (Agencywide Documents Access and Management System (ADAMS) Accession No. [ML22196A366](#)). The proposed changes would revise each plant's technical specification definition of "Leakage," clarify the requirements when pressure boundary leakage is detected, and add a Required Action when pressure boundary leakage is identified..

The associated proposed no significant hazards consideration for these amendment requests was published in the Federal Register on September 6, 2022 ([87 FR 23274](#)).

Thanks,

Perry Buckberg
