Subject: License Renewal Application

Discussion: The call was to clarify the licensee's material request. Specifically, the amount of material requested for each isotope by gauge manufacturer. The licensee indicated that he would like to get authorization for four (4) CPN MC Series, two (2) Troxler 3411B (3400 Series), and ten (10) InstronTek 3500 series gauges. This authorization is lower than is currently authorized on the license.
