REQUALIFICATION PROGRAM INSPECTION

Dear David Rhoades:

In a telephone conversation on January 3, 2023, Todd Fish, Senior Operations Engineer, and Durand Adams, Licensed Operator Training Lead, made arrangements for the U.S. Nuclear Regulatory Commission (NRC) to inspect the licensed operator requalification program at the Peach Bottom facility. The inspection is planned for the week of March 27, 2023, which coincides with your scheduled requalification examination cycle. The staff at your facility should prepare and conduct the requalification examinations in accordance with your NRC-approved requalification program.

In accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) Part 55.59(c), the NRC may request facility licensees to submit their biennial comprehensive requalification written examinations or annual operating tests as necessary to support the NRC's inspection program needs. In order for the NRC to adequately prepare for this inspection, please furnish: (1) an index or summary of condition reports written in the past 2 years in which licensed operator errors were determined to be the root or contributing cause; (2) an index or summary of condition reports written in the past 2 years on simulator performance problems; (3) an index or summary of simulator performance test results in the past 2 years; and 4) the examination schedule, sample plan, and operating test scheduled for the week of the inspection to the NRC by March 20, 2023. Duran Adams has been advised of this request and provided with the name and address of the NRC lead inspector assigned to this inspection.
