Washington, DC 20017

SUBJECT: CAPITAL CARDIOLOGY CONSULTANTS, P.C., REQUEST FOR ADDITIONAL
INFORMATION, MAIL CONTROL NO. 632647

Dear Dr. Quash:

This is in reference to your letter dated December 01, 2022, requesting to renew NRC License No. 08-30727-01. In order to continue our review, we need the following additional information:

Item 9, Facility Diagram – Your December 1, 2022 letter included an updated facility diagram detailing the specific rooms where licensed byproduct materials are used and/or stored. The facility diagram included a description of which specific doors could or could not be locked and a description of future plans to enhance how your facility secures materials. For a more specific description of the areas/doors in question, please contact me at the number listed below.

- a. Please describe the controls in place to ensure that materials remain secured (e.g., locked) from unauthorized access or removal at all times in accordance with 10 CFR 20.1801 and 20.1802.
- b. Please confirm the anticipated date the additional security enhancement(s) will be installed.

We will continue our review upon receipt of this information. Please reply to my attention at Jonathan.Pfingsten@nrc.gov.

In order to continue prompt review of your application, we request that you submit your response to this letter within 30 calendar days from the date of this letter.

An electronic version of the NRC's regulations is available on the NRC Web Site at: www.nrc.gov. Additional information regarding medical uses of radioactive materials may be obtained on the NRC Web Site at: <http://www.nrc.gov/materials/miau/med-use-toolkit.html>. This site also provides the updated Training and Experience NRC Form 313A series of forms and guidance, as well as information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>. Please be aware that you may request that certain

portions of your submittal to NRC be withheld from public disclosure as proprietary information. To do this, you must execute an affidavit as specified in 10 CFR 2.390. You must list all portions that you wish to be held proprietary, along with your reasoning as to why that is appropriate. While it is allowable, please refrain from submitting proprietary information in support of a license unless necessary. Keep in mind that all NRC licenses are considered to be in the public domain, and therefore may be viewed by any member of the public who requests to see them.

If you have any questions regarding this request for additional information, please contact me at 610-337-5170 or via electronic mail at Jonathan.Pfingsten@nrc.gov.

Thank you for your cooperation.

Sincerely,

Jonathan Pfingsten, Senior Health Physicist
Medical and Licensing Assistance Branch
Division of Radiological Safety and Security
