Re: INCREASE IN ANI'S AVAILABLE PRIMARY LIABILITY INSURANCE CAPACITY

Dear Ms. Henderson,

This letter is to inform you that American Nuclear Insurers (ANI) will increase its maximum available primary nuclear liability limit from \$450 million to \$500 million effective on January 1, 2024. This higher limit will be available on that date to all qualified operating power reactor NRC licensees. As you know, Section 170b. of the Price-Anderson Act requires all operating power reactor NRC licensees to provide evidence of primary financial protection equal to the maximum amount of liability insurance available from private sources at reasonable terms. This change in limit may require a change in Title 10, Part 140.11 of the Code of Federal Regulations. The primary limit was last increased on January 1, 2017.

In addition, ANI will increase the contingent liability of the companies limit contained in the Master Policy (Secondary Financial Protection) available from \$30 million to \$35 million effective January 1, 2024. Therefore, the total contingent liability of the companies for all excess losses arising out of two or more nuclear incidents shall not exceed \$70 million.

If you have any questions with respect to this notification, please let me know.

Sincerely,

A handwritten signature in cursive script that reads "Jim Palaia".

Jim Palaia
