Comments: The BTP 7-19, which is part of the standard review plan for light-water reactors, provides the NRC staff with review guidance for evaluating an applicant's assessment of the adequacy of defense in depth and diversity for a proposed digital instrumentation and control system. The revisions update the guidance to incorporate the expanded policy described in SRM-SECY-22-0076 (ML23145A181 and ML23145A182).

The NRC provides reasonable accommodations to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in a meeting or need a meeting notice or the transcript or other information from a meeting in another format (e.g. braille, large print), please contact Anne Silk, NRC Reasonable Accommodations Coordinator, at [Anne.Silk@nrc.gov](mailto:Anne.Silk@nrc.gov) or call directly at 301-287-0745. Determinations on requests for reasonable accommodation will be made on a case-by-case basis. Ten (10) days' advance notice is requested to try to ensure availability; however, every effort will be made to address a request for reasonable accommodations with less notice.
