

# **Public Workshop to Discuss Corporate Inspections**

**December 15, 2023**

**Douglas Bollock and Amar Patel**  
**US Nuclear Regulatory Commission**  
**Nuclear Reactor Regulation**  
**Division of Oversight**

# Public Workshop

- NRC will be facilitating the discussion today.
- Focused on evaluating any potential inspections or areas that could benefit from consolidation.
- Explore how would this work.

# Discussion Areas

- What NRC inspections should be considered for corporate inspection?

# Discussion Areas

- How would any issues/violations found be adjudicated?
  - Does each licensee get a violation for something found at the common corporate facility?
  - Do findings/violations fall under the ROP as they do today?
  - Are changes needed to the NRC's enforcement policies or guidance/ROP guidance?

# Discussion Areas

- How would those inspections fit into the ROP?
  - How are sites with corporate consolidated inspections treated the same as those without consolidated inspections?
  - Are changes needed to ROP annual inputs? Do we need to change cross-cutting theme input?

# Discussion Areas

- How would corporate inspections increase effectiveness and efficiencies?

# Discussion Areas

- What could be some unintended consequences or shortfalls?

# Discussion Areas

- What other changes to the ROP inspection program should we consider/reconsider?

# Next Steps

- NRC staff evaluates options gathered during workshop
- NRC management briefed on results – January/February 2024
- Inform Public and Industry of NRC evaluation results in future public meeting - March 2024
