Title: REGULATORY CONFERENCE WITH TENNESSEE VALLEY AUTHORITY (TVA) - SEQUOYAH NUCLEAR PLANT

Date(s) and Time(s): May 02, 2024, 10:00 AM to 12:00 PM ET

Location: U.S. NRC, Region II Office, Marquis One Tower, 8th Floor Conference Center
245 Peachtree Center Avenue, N.E.
Atlanta, GA

Category: This is an Observation Meeting. This is a meeting in which attendees will have an opportunity to observe the NRC performing its regulatory function or discussing regulatory issues. Attendees will have an opportunity to ask questions of the NRC staff or make comments about the issues discussed following the business portion of the meeting; however, the NRC is not actively soliciting comments towards regulatory decisions at this meeting.

Purpose: The purpose of this regulatory conference is to discuss, before the agency makes a final determination, the safety significance of a preliminary finding of greater-than-Green and associated apparent violation of NRC requirements regarding the failure to establish, implement, and maintain adequate procedures for maintenance activities on the 1B Diesel Generator exhaust valves, which resulted in its failure on September 19, 2023 at the Sequoyah Nuclear Plant. The preliminary greater-than-Green finding and apparent violation are discussed in NRC Inspection Report 05000327/2024090 and 05000328/2024090, dated March 19, 2024 (NRC's Agency wide Documents Access and Management System [ADAMS] Accession No. ML24066A197).
