

PUBLIC MEETING ANNOUNCEMENT

Title: Virtual Public Meeting between the US Nuclear Regulatory Commission and the Pressurized Water Reactor Owners Group to Discuss Liquid Penetrate Testing Examination Frequency

Date(s) and Time(s): September 30, 2024, 08:30 AM to 10:30 AM ET

Location: Webinar, Virtual Only

Category: This is an Observation Meeting. This is a meeting in which attendees will have an opportunity to observe the NRC performing its regulatory function or discussing regulatory issues. Attendees will have an opportunity to ask questions of the NRC staff or make comments about the issues discussed following the business portion of the meeting; however, the NRC is not actively soliciting comments towards regulatory decisions at this meeting.

Purpose: This is a follow-up meeting to the one held on August 8, 2024. The purpose of this meeting is to discuss NRC's feedback to a program that will provide a basis for extending the liquid penetrate testing (PT) examination frequency for embedded flaw repairs (EFR) performed on reactor vessel head penetrations discussed in WCAP-15897-NP-A, Rev. 2. "The NRC Safety Evaluation for WCAP-15897-NP-A, Rev. 2 requires a PT examination of an EFR every refueling outage."

The NRC provides reasonable accommodations to individuals with disabilities where appropriate. If you need a reasonable accommodation due to a disability to participate in a meeting or need a meeting notice or the transcript or other information from a meeting in another format (e.g. braille, large print), please email Reasonable_Accommodations.Resource@nrc.gov. Determinations on requests for reasonable accommodation will be made on a case-by-case basis and the agency may choose between effective accommodations to provide. At least ten (10) days advance notice is recommended in order for a request for accommodation to be processed and implemented if approved. However, every effort will be made to address any reasonable accommodations requests received with less notice.
