Title: Presubmittal Teleconference with Wolf Creek Nuclear Operating Corporation Regarding a Planned License Amendment Request for Wolf Creek Generating Station, Unit 1 (EPID L-2024-LRM-0136)

Date(s) and Time(s): December 03, 2024, 02:00 PM to 03:30 PM ET

Location: Webinar

Category: This is an Observation Meeting. This is a meeting in which attendees will have an opportunity to observe the NRC performing its regulatory function or discussing regulatory issues. Attendees will have an opportunity to ask questions of the NRC staff or make comments about the issues discussed following the business portion of the meeting; however, the NRC is not actively soliciting comments towards regulatory decisions at this meeting.

Purpose: The purpose of this meeting between Wolf Creek Nuclear Operating Corporation (WCNOC, the licensee) and the U.S. Nuclear Regulatory Commission (NRC) staff, is to provide information to the NRC staff regarding a potential license amendment request that would add a new license condition to allow for the implementation of Title 10 of the Code of Federal Regulations (10 CFR) Section 50.69, "Risk-informed categorization and treatment of structures, systems and components for nuclear power reactors." Section 50.69 of 10 CFR allows adjustment of the scope of structures, systems, and components (SSCs) subject to special treatment requirements (e.g., quality assurance, testing, inspection, condition monitoring, assessment, and evaluation) based on an integrated, systematic, risk-informed process for categorizing SSCs according to their safety significance. Publicly available presentation slides for this meeting can be found in the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML24311A157.
