Title: Clarification meeting on applicability requirements for RG 1.13 and SRPs 9.1.2 & 9.1.4 to water levels during refueling operations

Date(s) and Time(s): December 05, 2024, 01:30 PM to 02:30 PM ET

Location: Webinar

Category: This is an Observation Meeting. This is a meeting in which attendees will have an opportunity to observe the NRC performing its regulatory function or discussing regulatory issues. Attendees will have an opportunity to ask questions of the NRC staff or make comments about the issues discussed following the business portion of the meeting; however, the NRC is not actively soliciting comments towards regulatory decisions at this meeting.

Purpose: Tennessee Valley Authority is seeking clarification on the following scenario: When the Spent Fuel Pool and Reactor Cavity pool water volumes are cojoined during refueling operation (Pool divider gate removed), is the Regulatory Guidance provided in RG 1.13 and SRPs 9.1.2 & 9.1.4 applicable to the contiguous volume of water?
