Decommissioning Lessons Learned Workshop

January 15, 2025

Elise Eve

Team Leader, USNRC Region I

Recent Issues

- **Radiation Protection**
 - **Failure to control airborne radioactivity**
 - **Failure to implement adequate controls in alpha level 3A areas**
 - **Unauthorized access to locked high radiation areas**

Recent Issues

- **Transportation**
 - **Failure to ensure shipment was leakproof**
 - **Failure to ensure packaging was appropriate for the contents being shipped**
 - **Radioactive material shipment package dose rate exceeded**

- **Fire Protection**

- Failure to control fire hazards with transient combustible permit
- Failure to include fire dampers in fire protection program evaluation and fire pre-plans
- Failure to perform fire watch duties with trained personnel
- Failure to implement fire protection system impairment control procedure

Recent Issues

- **Decommissioning Trust Fund (DTF)**
 - Use of the DTF for expenses that were not legitimate decommissioning activities (i.e., community outreach, restart activities).
- **Discouraging Language in Agreements**
 - Licensee agreements that contain language that would restrict or otherwise discourage employees from participating in protected activities.

Recent Issues

- **Industrial Safety**
 - Continue to monitor OSHA reportable events
 - Referrals to OSHA as appropriate

Discussion & Questions
