Title: Public Meeting on Guidance Development for Accelerated Material Qualification

Date(s) and Time(s): May 06, 2025, 01:00 PM to 05:00 PM ET

Location: Hybrid, One White Flint North, 01F23
11555 Rockville Pike
Rockville, MD

Category: This is an Information Meeting with a Question and Answer Session. The purpose of this meeting is for the NRC staff to meet directly with individuals to discuss regulatory and technical issues. Attendees will have an opportunity to ask questions of the NRC staff or make comments about the issues discussed throughout the meeting; however, the NRC is not actively soliciting comments towards regulatory decisions at this meeting.

Purpose: In response to the ADVANCE Act and as described in Table 3 of the report "Advanced Methods of Manufacturing and Construction for Nuclear Energy Projects" (ML24292A171), NRC staff are acting to potentially develop guidance on accelerated material qualification. NRC staff are holding a public meeting from 1 PM – 5PM on May 6, 2025, with advanced reactor vendors and other stakeholders. The meeting's focus will be to gather information on vendor activities and plans related to accelerated qualification of materials. Among the information sought is the anticipated timeline(s) for development of materials via advanced manufacturing and traditional manufacturing for use in near-term and mid-term advanced reactors designs. This meeting will be recorded to ensure that all the comments made during the meeting will be captured and summarized appropriately for the meeting summary and the report.

This is part of the agency's efforts to enable efficient safety and licensing reviews.
