Regulatory Basis

Appendix B to “Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants,” to Title 10 of the *Code of Federal Regulations*, (10 CFR) Part 50, “Domestic Licensing of Production and Utilization Facilities,” prescribes requirements for quality assurance (QA) to ensure that structures, systems, and components (SSCs) will perform satisfactorily in service. Specific criteria in Appendix B to 10 CFR Part 50 that are applicable to this request for additional information include:

- Criterion II, “Quality Assurance Program,” requires the identification of SSCs to be covered by the QA program.
- Criterion III, “Design Control,” requires in part that (1) measures be established for the selection and review for suitability of application of materials, parts, equipment, and processes that are essential to the safety-related functions of SSCs, and (2) quality standards be specified and that design control measures shall provide for verifying or checking the adequacy of design.
- Criterion IV, “Procurement Document Controls,” requires that measures be established to assure that applicable regulatory requirements, design bases, and other requirements are suitably included or referenced in the documents for procurement of materials, equipment, and services.
- Criterion VII, “Control of Purchased Material, Equipment, and Services,” addresses control of purchased material, equipment, and services.
