Category: This is a Comment-Gathering Meeting. The purpose of this meeting is for NRC staff to meet directly with individuals to receive comments from participants on specific NRC decisions and actions to ensure that NRC staff understands their views and concerns.

Purpose: This is a continuation of a public meeting held July 14, 2025, on this topic. This is a 2-day meeting. Executive Order (EO) 14300 Section 5(e) directs the NRC to establish a process for high-volume licensing of microreactors and modular reactors, including by allowing for standardized applications and approvals and by considering to what extent such reactors or components thereof should be regulated through general licenses. The NRC is developing a proposed rule to address licensing requirements for microreactors and other low consequence reactors. The NRC is holding this public meeting to obtain stakeholder feedback.
