Location: NRC One White Flint North, HQ OWFN-01G05B

Category: This is an Information Meeting with a Question and Answer Session. Attendees will have an opportunity to ask questions of the NRC staff or make comments about the issues discussed throughout the meeting; however, the NRC is not actively soliciting comments towards regulatory decisions at this meeting.

Purpose: The objective of this workshop is to provide a forum for the NRC and the industry to discuss ongoing efforts to improve PRA Realism. This is a continuation of the workshop originally scheduled for September 30-October 1 that was interrupted due to the government shutdown. Topics will include presentations on PRA modeling applications, operating experience, external hazards, human reliability analysis, regulatory and oversight applications, realism for advanced reactors and public perspectives.
