Title: Presubmittal Teleconference with Dominion Energy Nuclear Connecticut, Inc. Re: Proposed License Amendment Request for Millstone Power Station, Unit No. 2, Re: Reactor Coolant System and Secondary System Specific Activity Limits

Date(s) and Time(s): May 09, 2019, 01:00 PM to 02:30 PM

Location: Teleconference

Category: This is a Category 1 meeting. The public is invited to observe this meeting and will have one or more opportunities to communicate with the NRC after the business portion of the meeting but before the meeting is adjourned.

Purpose: The purpose of this teleconference is to discuss Dominion Energy Nuclear Connecticut, Inc.'s (Dominion's) proposed license amendment request to revise technical specification (TS) limits for reactor coolant system and secondary system specific activity for Millstone Power Station, Unit No. 2 (Millstone). The proposed TS limit changes will be based on the re-analyses of radiological consequences following postulated design-basis main steam line break and steam generator tube rupture accidents per NRC Regulatory Guide 1.183. The re-analyses addresses non-conservatisms identified in the current analyses, including an operability determination that limits the reactor coolant system specific activity to 85 percent of the Millstone TS limit. Dominion will discuss the scope and proposed schedule associated with the submittal.
