Title: Teleconference with Exelon Generation Company, LLC Re: R. E. Ginna Nuclear Power Plant License Amendment Request to Add a One-Time Note for Use of Alternative Means for Residual Heat Removal

Date(s) and Time(s): March 02, 2020, 02:00 PM to 03:00 PM

Location: NRC One White Flint North, O8-B04  
11555 Rockville Pike  
Rockville, MD

Category: This is a Category 1 meeting. The public is invited to observe this meeting and will have one or more opportunities to communicate with the NRC after the business portion of the meeting but before the meeting is adjourned.

Purpose: The purpose of this teleconference is for the NRC to discuss with Exelon Generation Company, LLC (Exelon) the R. E. Ginna Nuclear Power Plant's expedited outage-related license amendment request to add a one-time note for use of alternative means for residual heat removal. Exelon proposes to revise Technical Specification (TS) 3.4.7 ("RCS [Reactor Coolant System] Loops – MODE 5, Loops Filled") and TS 3.4.8 ("RCS Loops – MODE 5, Loops Not Filled") to add an asterisk to the term "residual heat removal (RHR) loop", in order to expand the definition of an RHR loop to include a water-solid steam generator loop, as well as an alternate RHR loop. This one-time change is requested to support the station in the shutdown of the reactor during the upcoming refueling outage scheduled to start in April 2020, due to the possibility of not being able to open the normal RHR suction valve MOV 700.
