Title: EMBARK - Public Workshop on the Risk-Informed Process for Exemptions (RIPE)

Date(s) and Time(s): May 14, 2020, 01:00 PM to 03:30 PM

Location: Webinar

Category: This is a Category 2 meeting. The public is invited to participate in this meeting by discussing regulatory issues with the Nuclear Regulatory Commission (NRC) at designated points identified on the agenda.

Purpose: This meeting is the first opportunity to have a public engagement on the NRC staff's efforts to address Recommendation 5 (i.e., assess options for addressing low safety significant issues within the licensing basis) that was endorsed in the Low Safety Significant Issue Resolution (LSSIR) Recommendation memorandum (ADAMS Accession No. ML19260G224). This meeting will discuss an initiative by the NRC's EMBARK Venture Studio, in conjunction with experts within NRR, to develop a process to use risk-informed exemptions to address very low safety significant issues within the licensing basis. This meeting is intended to provide an opportunity for NRC staff, industry, and the public to discuss EMBARK Venture Studio's initiative and to explore its viability and usefulness, including whether it or portions of it can be used to address low safety significant issues through exemptions or other NRC approval processes.
