Title: Using Risk Information in AMP Implementation and Other Uses of Risk in License Renewal (EMBARK Venture Studio May 27, 2020, Meeting Series, Part 4 of 4)

Date(s) and Time(s): May 27, 2020, 01:00 PM to 04:00 PM

Location: Webinar

Category: This is a Open meeting. Public participation is actively sought for this meeting to fully engage the public in a discussion of regulatory issues.

Purpose: The NRC and industry will be discussing ideas for incorporating formal risk insights into license renewal, including AMP implementation, applications and reviews. NRC has been exploring possibilities as part of Embark Venture Studio. The discussion will focus on using risk information in the implementation of Aging Management Programs. Then, in order to gauge interest and feasibility, NRC and the industry will discuss 1) how risk categorization information from 50.69, "Risk categorization of structures, systems, and components," may be used broadly in a license renewal application (first or subsequent) and 2) if and how exemptions from the deterministic scoping and screening criteria may be sought.
